VIETNAMESE PREMIUM HAIR

Vietnamese Hair Excellence – 100% Authentic Sourcing by Royal Hair

Vietnamese human hair has earned a strong reputation in the global market thanks to its natural strength, smooth texture, and exceptional durability. Collected from healthy donors with naturally straight, dark hair, Vietnamese hair offers superior performance in styling, coloring, and long-term use. Its intact cuticle alignment minimizes tangling and shedding, while maintaining a soft, silky feel that meets the standards of high-end wig and hair system production.

At Royal Hair, we are committed to delivering true authenticity. We proudly affirm that all of our products are made from 100% Vietnamese human hair—no blending, no synthetic fibers, and no mixed origins. This commitment ensures consistency, transparency, and the highest level of trust for our partners worldwide.

To meet different market demands, we offer four distinct hair categories:

- Regular Vietnamese Hair – stable quality with cost-effective pricing. Can not bleach to color #613.
- Premium Remy Hair – full cuticle alignment for a luxurious, natural finish. Hair can bleach to #613
- Baby Thin Hair – ultra-fine, soft strands ideal for premium wig making. Hair is collected from young girl, it is virgin, undyed, unprocess before
- Grandma Natural White Hair – rare, naturally white hair for specialized needs

With deep expertise and strict quality control, Royal Hair stands as your reliable partner in premium Vietnamese hair solutions.

Regular Hair

Premium Hair #613

Remy Hair

Premium Hair #60C

Baby Thin Hair

Vietnamese Premium Hair

On the market, hair length distribution at the ends is generally classified into three categories:

- Single Drawn (SD)
- Double Drawn (DD)
- Super Double Drawn (SDD)

At Royal Hair, our pricing is based on Double Drawn quality, ensuring a balanced density with fuller ends that meet premium standards.

For clients requiring wefted hair, we offer two options:

- Machine Weft
- Genius Weft

Depending on the desired finish and application.

Please note that when processing hair into wefts, there will be a reduction of approximately 2 inches (5 cm) in the final hair length due to the construction technique.

We aim to provide transparent specifications and consistent quality to meet your production needs.
